is giving my husband more than breakfast.

Please tell me what to do about it.—AGGIE.

Dear Aggie: Get on the night shift, Toots.

Dear Ann Landers: I loved your answer to "Also Not Ashamed."

I agree with you that an epileptic who functions as well as "Also" makes a mistake when she keeps her affliction a deep dark secret. She could do immeasurable good by telling her friends she is an epileptic and acquainting them with the true nature of the disease.

Epileptics are their own worst enemies. Too many of us keep our illness at the Dark Age level and behave as if it were some despicable, loathesome thing. We then criticize others because they are ignorant and prejudiced.

If epileptics wish to be treated as normal human beings they should lead the way by being open and unashamed — and by demonstrating that epileptics are not so different from other people, after all. — SAN ANTONIO.

Dear San: Well said and thank you for saying it. I agree the most effective job of enlightening the public can be done by epileptics themselves.

This takes courage but even the lowly turtle knows that if he is to make progress he must stick out his neck.

When necking becomes petting, watch out! To learn how the smart girl keeps both her dignity and her boy friend, send for ANN LANDERS' booklet, "Necking and Petting — And How Far to Go," enclosing with your request 20¢ in coin and a long, self-addressed, stamped envelope.

Ann Landers will be glad to help you with your problems. Send them to her in care of this newspaper enclosing a stamped, self-addressed envelope.
